

FOWLER HEALTH CENTER Opened in March

As of March 2016 our Fowler Health Center was opened to the public. The construction of this Health Center has been a goal of ours for the past two plus years and we are excited to see it come to fruition.

The health center is located in downtown Fowler and will offer a full range of services, including medical, dental, optometry, behavioral health, podiatry, and laboratory services. This health center will be the first Federally Qualified health center in the Fowler area which means that we receive Federal funding to offset cost for healthcare as we see everyone in the community that walks through our doors regardless of their legal status or lack of healthcare coverage.

At United Health Centers we believe that we do more than provide quality health care. UHC forms partnerships with schools and local community members in order to form a bond and ensure longevity and consistency in the communities. We hope to become a catalyst for economic and social growth for the community.
